

PROGRAMME SPECIFICATION

This Programme Specification is correct as of the date indicated; however, minor amendments may be made throughout the year and will be incorporated in the annual updating process.

SECTION A: DETAILS OF THE COURSE AND AWARD

Programme Title	BSc (Hons) Psychology BSc (Hons) Psychology with Foundation Year BSc (Hons) Psychology with International Foundation Year
Awarding Body	Buckinghamshire New University
Teaching Institution / Delivery Location	Buckinghamshire New University / High Wycombe, UCAV & Uxbridge
Name of Final Award	Bachelor of Science with Honours, BSc (Hons)
NQF/FHEQ Level of Qualification	Level 6: Bachelor's degree with honours
QAA Benchmark Statement(s)	Psychology (2007)
UCAS Code	C800
Course Code(s)	BH1PSY1 (Full Time) BH1PSY2 (Part Time) BH1PSY4 (Full Time with Foundation Year) BH1PSY4I (Full Time with International Foundation Year)
Mode and Length of Study	3 years Full time 5 years Part time 4 years Full-time with Foundation Years
Number of Intakes	2: September & January
Regime of Delivery	Attendance
Language of Study	English
Details of Accreditation	This programme has been designed to meet the requirements of the British Psychological Society's Qualifying Examination. This programme is accredited as conferring eligibility for the Graduate Basis for Chartered Membership (GBC), provided that the minimum standard of a Lower Second Class Honours is achieved. This is the first step towards becoming a Chartered Psychologist.
Publication Date	01 July 2014 Revised Nov 2017, revised January 2018, April 2018, July 2018, Sept 2018, Nov 2018, August 2019, Aug 2021

Potential Student Profile / Criteria for Admission:

What the award is about and who the programme is aimed at:

The BSc (Hons) Psychology is a psychology award which is designed to permit the students to combine studying the core areas of psychology with a choice of applied and theoretical areas of psychology.

The programme is for students wishing to study for a Psychology award which is accredited by the British Psychological Society. All students who complete the programme will be eligible for the Graduate

Basis for Chartered membership (GBC) with the British Psychological Society, providing they achieve a minimum of a 2.2 degree classification or above (50% or above).

Entry criteria

For BSc (Hons) Psychology (3 years)

- School leavers with a minimum of 96 UCAS points.
- Mature students with a variety of educational backgrounds (e.g. Access) who are motivated to pursue a course in this field of psychology.
- Prospective students are expected to have attained a minimum of a C/4 grade in GCSE Mathematics and English.
- Students who have commenced their studies in another institution and wish to transfer in to this programme in year 2 or 3 will be considered under the provisions of the University's Credit Accumulation and Transfer Policy.
- Mature students who wish to apply for accreditation of prior experiential learning for specific modules will be considered under the provisions of the University's Credit Accumulation and Transfer Policy.

For BSc (Hons) Psychology with Foundation Year and International Foundation Year (4 years)

Applicants who do not meet the minimum requirements for the 3-year programme, or those who do not feel fully prepared for a Level 4 course, will be considered for the 4-year programme including a Foundation Year.

The International Foundation year will be an accelerated year commencing in January and running until June. This will enable these students to join the level 4 cohort in September of the same year.

Please see the University's [General Entry Requirement](#) webpages for requirements for entry at this level.

Why students should choose this award:

Students wishing to pursue a career in any of the sub-disciplines of psychology should choose this award. This programme will also help to develop a variety of transferable skills valued by employers, enhancing employability in a range of occupations and professions, particularly those valuing dealings with people. Such skills include skills in communication, numeracy, teamwork, critical thinking, computing, independent learning and more. Thus, those seeking to enhance these skills could also choose this programme.

Opportunities available for students after completion of the award:

- The programme offers both a subject-specific and a generic knowledge base, skills and competences that will enable students to pursue a career in any of the applied psychology professions.
- It is also recognised that many Psychology students will choose from a wide range of graduate career options, not all of which will entail the title 'psychologist'. Consequently, the programme

is designed to inspire and facilitate the development of a variety of desirably transferable skills that will enhance employability in any future career, particularly those dealing with people.

- The thorough grounding in research methods and empirical Psychology will also confer suitability for the pursuit of research-based post-graduate study.
- Graduates who achieve a minimum standard of a Lower Second Class Honours will be eligible for Graduate Basis for Chartered Membership (GBC). This is the first step towards becoming a Chartered Psychologist.
- Graduates who achieve a 2.1 classification or higher in their degree are eligible to apply for Teacher Training.

Expected knowledge and skills that the entrant will have on entry to the programme:

Entrants would be expected to have a strong interest in the human and behavioural sciences. Experience of working within a charity, an organisation that supports vulnerable individuals or the care professions would be an advantage, but is not essential. Good communication skills are important as students will be assessed in a number of ways including both written work and oral communication, and at times through the course will be expected to converse and work with external organisations. Entrants must be prepared to take responsibility for their learning, and be willing to work both individually and as part of a group and to participate fully in course activities. Basic ICT skills will be an advantage as students are required to use the virtual learning environment to access course materials, and to submit coursework assignments electronically.

SECTION B: PROGRAMME AIMS, OUTCOMES, LEARNING, TEACHING AND ASSESSMENT METHODS

Programme Aims

The main educational aims of the programme are to:

- Provide a scientific understanding of the brain, the body and the environment in order to understand emotion, affect and behaviour, and the complex interactions between them, in individuals, groups and society.
- Develop the ability to use this knowledge in an applied capacity.
- Develop the ability to evaluate critically multiple perspectives in psychology.
- Develop the ability to use appropriate research methods in the acquisition and interpretation of empirical data.
- Develop the skills and knowledge required for entry to professional and/or academic postgraduate programmes of study in psychology.
- Develop the levels of skill and knowledge to equip the graduate for careers appropriate to human science graduates.
- Develop the generic key skills, knowledge and values that provide the foundations for life-long personal development.

Programme Learning Outcomesⁱ

A. Knowledge and Understanding

On successful completion of the programme a graduate will be able to:

1. Systematically understand the scientific underpinnings of psychology as a discipline, its historical origins, development and limitation.
2. Recognise the inherent variability and diversity of psychological functioning, where our knowledge is uncertain, ambiguous or limited, and its significance in the discipline of psychology.

3. Demonstrate an acquisition of coherent and detailed knowledge, and a systematic, critical and evaluative understanding of a range of influences on psychological functioning, how they are conceptualised in the behavioural sciences.
4. Devise and sustain arguments based on detailed knowledge of several specialised areas and / or applications of psychology, some of which are at the cutting edge of research in the discipline.
5. Demonstrate an ability to deploy a range of research processes, methods and measurement techniques, including statistical analysis, applicable to the behavioural sciences and be aware of their limitations

B. Intellectual/Cognitive Skills

On successful completion of the programme a graduate will be able to:

1. Reason and evaluate scientifically, understand the role of evidence and make critical judgments about arguments in psychology.
2. Adopt multiple perspectives and systematically detect, analyse and evaluate meaningful patterns of behaviour and the relationships between them.
3. Pose, frame, operationalise and critique research questions.
4. Enquire and reason statistically and use a range of statistical methods with confidence.
5. Competently initiate, design, conduct and report an empirically-based research project under appropriate supervision. Recognise its theoretical, practical and methodological contribution, implications and limitations, communicating this in a language appropriate to the audience involved.

C. Practical Skills

On successful completion of the programme a graduate will be able to:

1. Demonstrate computer literacy (e.g. the management of databases, word processing, PowerPoint, etc.) and the ability to use the applied statistical software (SPSS)
2. Demonstrate good communication skills, both oral and written
3. Demonstrate problem solving and decision making skills
4. Demonstrate ability to work both independently and as part of a team
5. Demonstrate substantial competence in research skills through practical activities, including an awareness and application of ethical principles and approval procedures with regard to research projects.

D. Key/Transferable Skills

On successful completion of the programme a graduate will be able to:

1. Communicate ideas and research findings, both effectively and fluently, by written, oral and visual means.
2. Be computer literate and confident in using word processing, data base and statistical software.
3. Comprehend and use numerical, statistical and other forms of data, particularly in the context of presenting and analysing complex data sets.
4. Solve problems by clarifying questions, considering alternative solutions and evaluating outcomes.
5. Be sensitive to, and react appropriately to, contextual and interpersonal factors in groups and teams.
6. Take charge of own learning, and reflect and evaluate personal strengths and weaknesses for the purposes of future learning. Undertake self-directed study and project management, in order to meet desired objectives.

Learning, Teaching and Assessment Methods to achieve the Programme Learning Outcomes

At Level 4 teaching and learning methods are aimed at introducing students to the core areas of psychology within the British Psychological Society Curriculum and providing them with a foundation of knowledge and skills to build upon in levels 5 and 6.

At level 4 a number of different methods will be utilised, including lectures, classroom-based activities, independent learning methods and practical sessions, where applicable. Lectures enable dissemination of knowledge to large numbers of students. They typically provide structure to the topic area in order to facilitate understanding and inspire students to think critically about the issues. At this level seminars will provide a forum in which students can engage with the subject, clarify issues and begin to discuss the subject matter.

At Level 5 students are expected to acquire more in-depth knowledge and understanding of the subject. Knowledge will be disseminated through lectures, but at this level seminar sessions will be much more student-led, and students will be expected to prepare in advance for each seminar. Student-led seminars facilitate development of cooperative team-work between students and individual communication skills, both of which are highly sought-after transferable skills.

At Level 6 students will be encouraged to develop independent learning, analytical and critical evaluation skills and critical application of their knowledge, taking into account wider contexts. Student presentations at this level encourage students to critically examine the application of psychological theory to human behaviour. Students are encouraged to work as a group to coordinate presentations to a professional standard.

Students will engage in a variety of other activities, including analysis of key readings, exercises on systematic literature searching and summarising information from journal articles, group discussions, debates, videos and practical activities.

Workshops – laboratory and computing – Workshop activities particularly focus on the practical use of the statistics software package SPSS, which is used by social scientists for the analysis and presentation of quantitative data. In addition, students will be given the opportunity to use the observation laboratory and to engage in the measurement of psycho-physiological responses using Biopac®.

The University has a **Virtual Learning Environment** called ‘*Blackboard*’, which is a digitally based programme that offers an abundance of supportive features used by lecturers teaching on this programme. This is not offered as an alternative to classroom interaction between students and lecturers, rather it is seen as an additional resource in the forms of:

- *Peer support* – facilitated through the use of the discussion board facility
- *Self-assessment* - quizzes
- *Notices* – maintains communication between lecturer and students between teaching sessions.
- *Resources page* – on-line links to good academic articles of relevance to the module
- *E-Journals* – students registered on Blackboard have the ability to access full-text e-journals that the library subscribes to from anywhere that they have Internet access.
- *Course documents* – such as; lecture handouts, seminar activities, module guides, seminar readings, assessment guidelines, reading list etc.

A number of careers talks will be arranged for the students to attend outside of the normal timetabled hours. These will cover a range of opportunities for both voluntary work and/or full-time employment. Additionally, a number of speakers will be invited to discuss their engagement in professional courses such as Forensic, Clinical and Counselling Psychology (e.g. MSc students, Forensic Psychologists in Training etc.).

Assessment methods

Summative assessments are designed to test the achievement of the learning outcomes. Some modules include formative assessments. Whilst these do not give marks towards the final module grade, they offer students a valuable learning resource by way of feedback from the tutors, which can offer direction for improved performance on the summative assignments.

A range of summative assessment methods will be employed on this course, as follows:

- **Essay** will provide the opportunity for students to demonstrate in-depth understanding of a particular aspect of their learning. It will encourage them to engage in conducting a systematic literature review and provide the opportunity for them to demonstrate their capacity to critically analyse, synthesis and evaluate the principles, processes and debates inherent in the material, and to present a rational, coherent, information-based argument.
- **Examinations** will allow the students to demonstrate their ability to synthesise a plethora of theoretical, empirical and applied literature in their examination answers. It will examine their capacity for independent thought, and ability to analyse and evaluate the information they are presenting in an original manner. Most examinations are unseen; however, some modules utilise a ‘seen’ examination, where the questions are released to the students two weeks prior to the examination date. These foster a higher level of analysis and evaluation than is possible in an unseen situation.
- **Time-constrained assignment** will enable the students to demonstrate the breadth of knowledge gained on a module. It will familiarise the students with examination style questions with which they will be confronted, either in the same module or subsequent modules.
- **Poster presentation** will enable the students to demonstrate the skills to present a complex piece of research in a brief, concise and visual format. Students may be required to work independently or in groups to coordinate a presentation to a professional standard.

- **Oral Presentations** will permit students to demonstrate their knowledge through effective communication skills, and to demonstrate sensitivity to contextual and interpersonal factors.
- **Seminar presentations** will enable students to demonstrate depth of knowledge, to demonstrate communication skills, both written and oral, to demonstrate their ability to work as a team, and to demonstrate sensitivity to contextual and interpersonal factors.
- **Laboratory / Research Reports** will be required in some modules. It will enable students to demonstrate their ability to: define a research problem, critically review relevant academic literature, formulate relevant hypotheses, operationalise variables and design a study, analyse and interpret the forthcoming data, to discuss the findings in relation to the literature, evaluate the contribution of the study to the knowledge area, and write the report in a formal scientific style.
- **Empirical Dissertation** represents a major piece of independent research activity chosen by the student and undertaken in their third year. This will be undertaken with support from an academic supervisor and with regular meetings throughout the academic year. This work will have the structure commonly found in research reports and journal articles, and may potentially be publishable.

During the Foundation Year, students will be exposed to a variety of summative and formative assessments whilst developing the academic skills to be a successful student at university; course content and Learning Outcomes strongly relate to students developing their knowledge and understanding of the subjects being studied and assessed.

Work-Based / Placement Learning

There is no work based/ placement learning for this award.

SECTION D: CONTACT HOURS

Note: Hours are worked on the basis of full-time study. 1 Academic Credit is equated to 10 notional learning hours. A full-time undergraduate student will normally study 120 credits in an academic year which is therefore equated to 1200 notional hours. A full time postgraduate student will normally study 180 credits in an academic year which equates to 1800 hours. Module Descriptors provide detailed breakdowns of the categories given below.

Table 4: Breakdown of Contact Hours

Year of course	Scheduled Learning and Teaching Activities	Guided Independent Study	Placement / Study Abroad	Total
Year One	321	879	-	1200
Year Two	312	888	-	1200
Year Three	242	958	-	1200
Total	1200	2400	-	3600

Students who study this programme with a Foundation Year will complete an additional 1200 hours during that year.

SECTION E: ASSESSMENT REGULATIONS

This programme conforms to the approved University procedures as detailed on the University website with the following exceptions:

The following modules may not be condoned:*

- **PS554 Quantitative Research** may not be condoned. The British Psychological Society places an obligation on universities and students to conduct research ethically. A primary measure of the ability to conduct ethical research is passing the research methods training at level 5.
- **PS654 Empirical Dissertation:** The British Psychological Society places an obligation on universities and students to conduct research ethically. A primary measure of the ability to conduct ethical research is passing the empirical dissertation.

This degree is calculated based on level 5 – 33% and level 6 – 67%.

No exit award is available for students who withdraw at the end of the Foundation Year.

This programme will be covered by the following University regulations: *Academic Assessment Regulations*

© 2014 Buckinghamshire New University

APPENDIX: OTHER AWARDS AVAILABLE

The following Exit Awards are available on this programme:

- Certificate of Higher Education (CertHE)
- Diploma of Higher Education (DipHE)
- Bachelor of Science (Ordinary degree)

Exit Award Programme Learning Outcomes

Certificate of Higher Education

On successful completion of a **Certificate of Higher Education (CertHE)**, a graduate will be able to:

- Evaluate the appropriateness of different approaches to solving problems related to Psychology
- Communicate the results of their study/work accurately and reliably, and with structured and coherent arguments

A **Certificate of Higher Education (CertHE)** will be awarded to a student who has completed the programme learning outcomes specified above. This is measured by achievement of 120 credits at Level 4. The following modules will count towards achievement of this award:

- PS450 Intro to Developmental & Social
- PS451 Intro to Biological and Cognitive
- PS452 Intro to Personality and Applying Psychology
- PS453 Psychological Research Methods
- PS454 Intro to Cross Disciplinary Psychology
- LC473 Making Sense of Society: The Sociological Imagination
- LC470 Making Sense of Society: Understanding the Social World

Diploma of Higher Education

On successful completion of a **Diploma of Higher Education (DipHE)**, a graduate will be able to:

- Use a range of established techniques to initiate and undertake critical analysis of information, and to propose solutions to problems arising from that analysis
- Effectively communicate information, arguments and analysis in a variety of forms to specialist and non-specialist audiences and deploy key psychological techniques effectively

A **Diploma of Higher Education (DipHE)** will be awarded to a student who has completed the programme learning outcomes specified above. This is measured by achievement of a combined total of 240 Credits comprising 120 credits at Level 4 **and** 120 Credits at Level 5. All modules at Level 4 and the following modules at Level 5 will count towards achievement of this award:

- PS552 Developmental Psychology
- PS553 Biopsychology
- PS554 Quantitative Research Methods
- PS555 Qualitative Research Methods
- PS556 Cognitive Processes in Psychology
- PS557 Personality & Individual Differences
- PS558 Conceptual & Historical Issues in Psychology

Ordinary degree

On successful completion of a **Bachelor of Science (Ordinary degree)**, a graduate will be able to:

- Apply, under guidance, the psychological methods and techniques that they have learned to review, consolidate, extend and apply their knowledge and understanding, and to initiate and carry out projects
- Critically evaluate arguments, assumptions, abstract concepts and data (that may be incomplete), to make judgements, and to frame appropriate questions to achieve a solution - or identify a range of solutions - to a problem
- Communicate information, ideas, problems and solutions to both specialist and non-specialist audiences.

An **Ordinary degree** will be awarded to a student who has completed the programme learning outcomes specified above. This is measured by achievement of a combined total of 300 Credits comprising 120 credits at Level 4, 120 Credits at Level 5, **and** 60 Credits at Level 6. All modules at Levels 4 and 5 and the following modules at Level 6 will count towards achievement of this award:

- PS603 Critical Social Psychology (*Core*)
 - Plus 2 options from Semester 1, 3 options from Semester 2
- PS655 Positive Psychology (*Optional*)
- PS656 Health Psychology (*Optional*)
- PS657 Business & Organisational Psychology (*Optional*)
- PS658 Advanced Developmental Psychology (*Optional*)
- PS659 Counselling Psychology (*Optional*)
- PS604 Principles of Psychopathology (*Optional*)
- PS661 Evolutionary Psychology (*Optional*)
- PS663 Exceptional Human Experiences (*Optional*)
- PS665 Educational Psychology (cannot be taken without PS658) (*Optional*)
- PS650 Police Psychology & the Legal Framework (*Optional*)
- PS651 Investigative & Forensic Psychology (*Optional*)

ⁱ The Programme Learning Outcomes have been drawn or adapted from the Quality Assurance Agency Subject Benchmark Statements for Psychology dated 2007 and the QAA Framework for Higher Education Qualifications in England, Wales and Northern Ireland dated August 2008.
