Opportunity Modules 23/24 – Module List

Opportunity Modules at our university are a unique and flexible educational offering designed to enrich your academic experience.

These modules provide you with the chance to explore diverse subjects and topics outside your main degree program, allowing you to broaden your horizons and delve into areas of personal interest.

You have the freedom to select two modules—one from each category—and with a duration of 5 weeks each, they fit seamlessly into your academic journey.

Guidelines:
- You will choose two modules, one in each "category". Category refers to the first and second halves of the term.
- The modules are 5 weeks in length, so you will do two in one term.
- Your selection will be based on preferences, please make your preferred first, second and third choice in each category.
- You may choose modules from the same theme in each Categories
- We will then do the best we can to give you your first preferred choice
- There will be a variety of online teaching modules and face to face (If you're an international learner, only face to face modules will be made available to you)

It's important to note that the Opportunity Modules will be scheduled on **Tuesdays from 3-6 pm and Wednesdays from 9 am to 12 noon.** Although they may not currently appear on your timetables, please keep these time slots in mind, as attendance will be monitored as part of your overall degree assessment.

Your course may incorporate opportunity modules in **either Term 2 or Term 3**. To confirm, consult your course structure or contact your course leader for further information.
